

Clinical OCCLUSION

Presented by **Stuart Orton-Jones**

10-12 Sept 2010 (Fri-Sun 8.30am-5pm) Friday 8.30am to 10.00 pm
including Dinner
Saturday 8.30am to 10.00 pm including Dinner
Sunday 8.30am to 5.00 pm

For Dentists and Technicians

Clear away the mysteries of occlusion

This is a Totally Clinically Orientate Practical Course
designed to help Participants identify and solve Occlusally Related Problems
in their everyday Clinical Practice

Participants will study the Numerous Occlusions Clinically This approach will be
reinforced by studying Several Mounted Study Models

LEARN ABOUT OCCLUSION

This enjoyable, exciting practical course takes the mystery out of occlusion.

Occlusion, made simple, makes dentistry more understandable.

Clear audio-visual aids and helpful, non-critical instruction
help participants understand occlusion.

Participants will be shown the theory and practical application of occlusion,
and will immediately benefit in their daily work.

“I have attended courses on occlusion before but came away very confused
The way the course is structured made it really easy to understand occlusion. Since then I
have become a completely different dentist. I look at my patient from a completely
different point of view. I have recommended this course to all my colleagues in my
practice.”

*If you have attended lectures on occlusion but not understood how it applies to everyday
dental practice, this hands-on course with individual attention is the answer.*

What you will do

Learn to understand the Principles of Occlusion as they apply to Reducing Grinding and Clenching of Teeth, Headaches and Temporo-mandibular Joint Problems,
The Application of Occlusion will be relevant Amalgam, Composite, Gold and Porcelain Restorations, Crown and Bridgework, Treatment of Periodontal cases, Orthodontics, Partial and Complete Dentures, Implant Dentistry.

Learn to Clinically Evaluate Patients for Occlusal Interferences, Headaches and Temporomandibular Joint Problems

Mounted models will be used to evaluate Occlusions of Numerous Patients

You will have your own Occlusions examined Clinically and by studying your own Mounted Models

Learn to mount Models on Semi-adjustable Articulators

The course covers Centric Records, Facebow Recordings, Model Mounting and the Construction and Evaluation of Articulated Study Models.

Construct and Evaluate Articulated Study Models

to analyse the static, dynamic and aesthetic aspects of an occlusion.

Clarify the significance of the Occlusion

as applied to the single tooth and the complete dentition.

"The hands on component is what sets this course apart. You get the cold hard facts, no rubbish when it comes to occlusion. It's also a rare opportunity to learn from someone who walks the talk and has also been fortunate to have learnt from some of the greats in dentistry. Worth the trip from Oz"

It was a great opportunity to improve my skills in impression taking and to learn more about what happens when the impressions are sent to the laboratory. It made me realize that the dentist should be more careful and don't expect miracles from the lab.

I loved the fact that you could interrupt anytime to ask anything and you would immediately get your question answered

It was a good chance to meet other dentists and share our concerns and dilemmas, A very friendly environment, a fantastic time.

It is definitely worth the time and the money.

WHAT YOU WILL LEARN

The Principles of Occlusion and Equilibration as they apply to all Dentistry

Occlusion in Implant Dentistry.

A Comprehensive New Patient Evaluation and Clinical Examination
and Periodontal Evaluation.

Centric Records and Facebow Recordings
